1 Cube

- Textures are PERFECTLY DONE~!!!
- I am not proud of implementing multiple textures cause it's nothing original, but I feel happy that I could implement my app the way I originally wanted without cutting any features out.
- Todos: for following several hours,
 - I may work on tune and fine the app to make the music I like, for examples the songs that I loved, "waiting for you", "(Everything I Do) I Do It For You (my beloved cousin)" etc.
 - The software engineering course instructor only communicate with PM. while our PM just told us yesterday that the material due time was yesterday (we assumed that it was 5/8 by default), and I saw it midnight last night, besides the JSON bug, the one feature I want to try is mobile/pad screen resize as I feel I understand fragment, and tried it with troubles (set buttons invisible, not sure if there is any better way to use fragment). But after rethink about it, I want to work on opengl 3d tetris first, and then unity CA && WA, so I will just fix the JSON bug then for tonight.
- The reason for choosing pictures:
 - horse: my beloved cousin's birth year;
 - sheep: my birth year;
 - dog: my cousin has a dog, and I have a dog at home too, they should hang out sometime, while my cousin and I need to stay together.
 - rabbit: my cousin and I both love this one a lot.
 - butterfly: It suffers and eventually it becomes a beautiful butterfly~!
- Tetris theme music played by MediaPlayer can only function as the background music now.
- Emacs + Auctex + org-mode can only export english correct with source codes, but can NOT export Chinese correctly from tex file yet. Need to find out the correct way to enable various kinds of latex engines from Auctex emacs mode.

.1 May Love Last Forever	
• Please don't get anything wrong, I always love my cousin, and as I can NOT make it any more clearer: I will be here in CA waiting for you.	right

- updated version of screen record vedio without music was put at https://www.youtube.com/watch?v=3fxbz2jUFE or by search deepwaterooo wang https://www.youtube.com/results?search_query=deepwaterooo+wang
 Current starting point turnning cube video was put at https://www.youtube.com/watch?v=EuILt6B0YS0
